

# TAKE ADVANTAGE OF **iQ**

POWERED BY  
  
**Bell**  
 SENSING TECHNOLOGIES®

## NEVER CHECK AN EMPTY TRAP AGAIN

Take the guesswork out of rodent control with Bell's multi-catch 24/7® iQ® mouse trap and the T-Rex® iQ snap trap, powered by Bell Sensing Technologies®.

Each iQ trap contains integrated Bluetooth technology, allowing the devices to share rodent activity data directly to technicians' phones. A free online portal then automatically generates reports, helping technicians know exactly when and where rodents are traveling.

Another benefit of iQ traps is they make service quick and painless. Traps are often set in hard-to-reach places because that's where rodents like to travel, but servicing those traps is time-consuming and challenging. With iQ,

devices communicate which traps have experienced rodent activity, so technicians don't need to kneel, bend over, or risk falling just to check an empty trap.

The T-Rex iQ features powerful, interlocking jaws and a removeable bait cup for quick service. The multi-catch 24/7 iQ's sleek design blends into the background, and it can even hold TRAPPER LTD disposable glue boards to make clean-up a snap.

To learn more, scan the QR codes or contact your Veseris representative.

- **Massive time savings – Never check an empty trap again**
- **Know exactly when and where rodent activity is spiking**
- **Free app and portal – no fees or subscription**

**VESERIS™** | Dedicated to being your Preferred Choice.

## Local Expertise, National Reach

Veseris has one of the largest footprints throughout North America. With 77 locations and growing, we make sure we're always within reach. When you visit a ProCenter, you can count on the widest selection of products, training, and local expertise to propel your business forward.
