MASTERLINE™ VESERIS SPRAYER: THE STAINLESS STEEL UPGRADE

Featuring a premium stainless steel pump cylinder, siphon tube, and wand extension—engineered for high-performance in the most demanding environments.

INDUSTRIES

Disinfection
Pest Control
Industrial
Concrete
Landscape
Mold Control

COMPATIBILITY

Water-Soluble Granules
Water-Based Formulations
Oil-Based Formulations

FEATURES & BENEFITS

► BUILT FOR PERFORMANCE

Engineered with a stainless steel pump cylinder, siphon tube, and wand extension, paired with Viton® seals and gaskets for superior chemical resistance to withstand harsh chemicals and demanding job environments.

► COLD-WEATHER DURABILITY

When liquids freeze, they expand—creating internal pressure that can crack vulnerable components, especially spray wands. The stainless steel helps minimize the risk of breakage in low-temperature environments, providing greater reliability in the field.

► DESIGNED TO BE SERVICEABLE

Easily accessible replacement parts and support help extend the life of your equipment and protect your investment over time.

► PRECISION SPRAY CONTROL

Equipped with a 4-way adjustable nozzle for precision coverage, consistent output, and reduced chemical waste.

► VERSATILE ACCESSORY OPTIONS

Compatible with a variety of adjustable nozzles, attachments, and wand extensions to give users the flexibility to adapt to different jobs with precision.

► HEAVY-DUTY HOSE ASSEMBLY

Includes a chemical-resistant hose with integrated spring strain relief for lasting resilience under frequent bending and strain, delivering both durability and ease of use.
