Drive® XLR8 herbicide

Excellent broadleaf and grassy weeds control

Advanced technology for selective postemergent control of grassy and broadleaf weeds, delivering unsurpassed crabgrass control and improved control of torpedograss, kikuyugrass, and broadleaves like clover and dandelion as well as other troublesome weeds.

Selective Efficiency	Superior Crabgrass Control	Challenging Weeds	Flexible Utility
			
Dependable postemergent herbicide for grassy and broadleaf weeds	Unsurpassed crabgrass control, even at maturity	Reliable tank-mix partner for improved activity and weed spectrum	Can be applied broadcast or spot, to multiple turf types, established or at seeding

Fast effective control

- Proprietary, water-based formulation
- Provides improved control
- Delivers quicker plant uptake
- Rainfast in less than one hour
- Up to 30 days residual

Drive® XLR8 herbicide controls crabgrass, foxtail, kikuyugrass, signalgrass and torpedograss + key broadleaves like bindweed, clover, dandelion, black medic and horseweed.

Drive XLR8 herbicide

Generic Quinclorac

Both treatments applied @ 64 fl oz/A Rutgers, 2023

Broad spectrum control and uses

- For residential, golf course, commercial, and other non-residential turfgrass sites
- Labeled for application to warm season and cool season turf types
- Tank-mix with Pylex® herbicide for improved control of annual grasses, resistant biotypes of crabgrass and more

Where to use Drive XLR8 herbicide

Turfgrass on lawns, golf courses, sports fields, sod farms, parks, roadsides, schools and more - see label for full list of use sites.

HRAC Group	Active Ingredients (%)	Usage Rate	Formulation	REI / PHI	Packaging	Key Weeds Controlled
4	Quinclorac (18.92%)	1.45 fl oz / 1000 ft ² 64 fl oz / acre	Water-based	12 hours / 0 days	4 x 0.5 gal 2 x 2.5 gal	Crabgrass, foxtail, kikuyugrass, clover, dandelion

Always read and follow label directions.
